

A collection of Rules and principles for and from Design Practice

Some people collect stamps, we collect rules: funny ones, stupid ones, useful, the best of the best... like for example the [Gestalt-rules](#). Break them only if you know them (*rule no. 18*).

1. Modularity & Hackability by Design (Projekte werden von Anfang an so gestaltet, dass sie erweiterbar, reparierbar und neu konfigurierbar sind: steckbare Module, standardisierte Schnittstellen, leicht zugängliche Schraub- statt Klebeverbindungen!)
2. Remix und Hack (Vorhandene Dinge werden umgebaut, „gehackt“ oder kombiniert, um neue Funktionen zu erzeugen. Remix meint bewusste Weiterentwicklung existierender Projekte statt reinem Neuanfang.)
3. Community Impact & Empowerment (Projekte sollen nicht nur technisch „cool“ sein, sondern Menschen befähigen: z.B. assistive Technologien, Bildungs-Tools, Reparaturinitiativen oder lokale Infrastruktur-Prototypen.)
4. Just talking is not enough
5. Learning through visualisation, hands-on experimentalism, and creating quick prototypes
6. Be integer
7. Have a spirit of goodness
8. Make a plan...
9. Stay focus on topic
