

Taiga

Taiga is an project management tool. [Website Documentation](#)

Troubleshooting

Taiga only displays old Stories

The server was probably restarted and

```
docker.socket
```

didn't restart correctly.

To fix this:

1. go into the ssh terminal

```
sudo systemctl stop docker
// you will probably get the warning: Warning: Stopping docker.service, but it can
still be activated by: docker.socket
sudo systemctl stop docker.service
```
