

# Courses Felix taught at ETI (since 2024)

The teaching focus at the Creative Technologies Lab is centered on exploring the intersection of design, technology, and human interaction. Students engage in hands-on, project-based learning to develop innovative solutions that combine creative approaches with technical expertise. Emphasis is placed on the integration of emerging technologies to address real-world challenges while fostering critical thinking, collaboration, and interdisciplinary problem-solving. The lab encourages experimentation, prototyping, and iterative design processes to equip students with the skills needed to thrive in dynamic, technology-driven fields. The following list gives an overview about courses given by affiliated faculty and teaching staff.

| Design Basics –<br>Praktische Grundlagen der<br>Gestaltung     | ETI Wahlpflicht Bachelor, 4.<br>semester, 5 CP  |  <p><b>Design Basics: Foundations of Digital Media Design</b><br/>Summer Semester 2025, Bachelor</p> <p>First Author: Michael Baur<br/>Second Author: Michael Baur<br/>Third Author: Michael Baur<br/>Fourth Author: Michael Baur</p> <p>The course focuses on the foundations of digital media design, covering topics such as design thinking, user-centered design, and the development of a user interface. The course is designed to provide students with a solid foundation in the field of digital media design.</p> <p>Design thinking is a process of creative problem-solving that involves understanding the user, challenging assumptions, and recombining elements to develop innovative solutions. User-centered design is a design approach that focuses on the needs and desires of the user, ensuring that the final product is usable and meaningful. The development of a user interface is a critical part of the design process, as it determines how the user interacts with the product.</p> <p>Design thinking and user-centered design are essential skills for anyone working in the field of digital media design. By understanding the user and their needs, designers can create products that are both functional and engaging. The development of a user interface is a complex task that requires a deep understanding of the user and the product. By following the principles of design thinking and user-centered design, designers can create products that are both usable and meaningful.</p> <p><a href="#">wiki-page</a></p> |
